

CV of Kai-Hsiang Wang

CONTACT INFORMATION	Northwestern University Department of Mathematics 2033 Sheridan Road Evanston, IL 60208	<i>E-mail:</i> khwang2025@u.northwestern.edu
------------------------	--	---

RESEARCH INTERESTS	Geometric analysis: geometric inequalities and calculus of variation on Riemannian manifolds; optimal transport, harmonic maps, Ricci limit spaces, free boundary problems Functional analysis: Approximation in RKHS
-----------------------	--

CURRENT ACADEMIC APPOINTMENTS	Graduate Student, Northwestern University Expected degree: PhD	Sep 2020 to present Jun 2025
-------------------------------------	--	---------------------------------

PREVIOUS ACADEMIC APPOINTMENTS	Research Assistant, NCTS Under supervision of Prof. Chung Jun Tsai (NTU)	Aug 2019 to Jan 2020
--------------------------------------	--	----------------------

EDUCATION	National Taiwan University (NTU) B.Sc. in Mathematics	June 2019
-----------	---	-----------

INVITED TALKS	1. Informal Geometric Analysis Seminar , Northwestern University, Feb 2023 Title: Optimal Transport Approach to Michael–Simon–Sobolev Inequalities
	2. Seminar on Differential Geometry , NCTS, Oct 2023 Title: Collapsing Ricci Limit Spaces with No Manifold Structure
	3. Seminar on Differential Geometry , NCTS, Aug 2024 Title: Introduction to Optimal Transport with Application to Geometric Inequalities
CONTRIBUTED TALKS	1. PIMS- IFDS- NSF Summer School on Optimal Transport , University of Washington, Jun 2022 Title: Optimal Transport Approach to Isoperimetric Inequality on Manifolds with Nonnegative Ricci Curvature
	2. The 39th Southeastern Analysis Meeting (SEAM 39) , Clemson University, Mar 2023 Title: An Optimal Transport Approach to Michael–Simon Inequalities
	3. The 40th South Eastern Analysis Meeting (SEAM 40) , University of Florida, March 2024 Title: Collapsing Ricci Limit Spaces with No Manifold Structure
TEACHING	Teaching Assistant , Northwestern University
	1. Single-Variable Differential Calculus (2 sessions) Fall 2021
	2. Multi-Variable Integral Calculus (2 sessions) Winter 2022
	3. Single-Variable Calculus with Pre-Calculus Fall 2022
	4. Elementary Differential Equations Fall 2022
	5. Series and Multiple Integrals Winter 2023
	6. MENU Linear Algebra/Multi-Variable Calculus Winter 2023
	7. Foundations of Higher Math Spring 2023
	8. MENU Linear Algebra/Multi-Variable Calculus Spring 2023
	9. Linear Algebra Fall 2023
	10. Analysis (Graduate Course) Fall 2023
